 dongjun.kim.eecs@gmail.com

Research Interests

Efficient Edge AI, Algorithm-Hardware Co-Design, Real-World AI

Education

- Kangwon National University**
B.S. Electronic and Semiconductor Engineering (GPA: 4.28/4.5, Rank: 2/93)
Military Service, Republic of Korea Army(Sergeant)
Gangneung, South Korea
March 2021 – Expected Feb 2027
Jan 2022 – July 2023
-

Publications

- Quantization Adversarial Distillation for Embedded Underwater Acoustic Target Recognition**
By Dongjun Kim, Sung-Hoon Park, Sangwook Park*
Minor Revision at IEEE Embedded Systems Letters (ESL), 2026. [Code]
 - Ultra-Lightweight Ship-Radiated Sound Classification for Real-time Embedded Inference**
By Sangwon Park, Dongjun Kim, Sung-Hoon Park, Sangwook Park*
Accepted at IEEE Embedded Systems Letters (ESL), 2026. [Paper] [Code]
-

Research Experience

L-MAP, Kangwon National University
Undergraduate Researcher
Gangneung, South Korea
Feb 2025 – Present

- Advised by **Prof. Sangwook Park**
- Developed QAD (KD + Adversarial Training + QAT) for underwater acoustic target recognition on resource-constrained edge devices; achieved 74.11% accuracy with 37% model size and 44% inference latency reduction on Raspberry Pi 5.

Purdue University
Visiting Scholar
West Lafayette, United States
Expected July 2026 – August 2026

- Advised by **Prof. Martin Byung-Guk Jun** and **Dr. Asif Tanveer**
 - Manufacturing and Materials Research Laboratories, End-to-end Edge AI system for real-time industrial acoustic monitoring, from IoT sensing to embedded inference.
 - Developed a real-time Edge AI system for CNC machine chatter detection and deployed it to a real CNC machine environment. [Slides]
-

Project

On-iseum - Integrated Public Transportation AIoT System for the Digitally Vulnerable
[GitHub]
Mar 2026 – Present

- Role: Technical Lead, Capstone Project — Designed end-to-end system pipeline
 - Deployed STT model, Face Recognition Model, and Large Language Model on Edge Devices(Raspberry Pi 5 with AI HAT+, Nvidia Jetson Orin Nano) for real time service.
-

Technical Skills

Languages: Python, C
ML Frameworks & Tools: PyTorch, Linux
Hardware: Raspberry Pi, NVIDIA Jetson Nano

Honors & Awards

Outstanding Project Team at Purdue-KIAT AI-track Program	August, 2026
Outstanding Individual at Purdue-KIAT AI-track Program	August, 2026
System-Semiconductor Micro Degree Scholarship by Kangwon National University	March, 2026
Outstanding Paper Award, IEIE Conference on Electronics, Semiconductor & AI	August, 2025
Academic Excellence Scholarship	1st Semester, 2025
Academic Excellence Scholarship	1st & 2nd Semester, 2024
Full-Tuition Merit Scholarship	2nd Semester, 2021

Teaching Experience

Advanced Programming TA(C language)	1st Semester, 2026
